Quality Assurance 'Forum Nights'

Group 5

Have been through the training before and some have been assessed back in April 2006 and passed very high quality.

We don't expect you to repeat the sessions, but feel free to join any group and please help us with your ideas and experiences with Q.A.

You are living proof that it's not all that bad!

It would be great to see you at a session, to guide or show your colleagues how you set up your environment, or what you submitted as evidence for the different indicators.

That would be a great help to us all.

Jane McKinlay
